and the control of th

HIGH SCHOOL COMMENCEMENT TAXES ON PROJECT LAND ILLEGAL

EIGHT SENIORS GRAD-

The commencement exercises of the Carlsbad High school were held in the High school auditorium on Friday evening, May 12, 1916, at which eight seniors were graduated from the full four year high school course.

Soon after eight o"clock, the Bunch orchestra struck up a lively march and the Board of Education headed by County Superintendent W. A. Poore, and followed by Dr. David R. Boyd, president of the New Mexico University, Dr. H. W. Lowry, Superintendent Geo. M. Brinton, and Principal O. Stanley Dresher took their places on the rostrum. As soon as they were seated, the graduates,

thirteen years ago when but two were graduated. He stated that the occasion was not the end of the educating process for the graduates but only the beginning, as one must learn all through life, and that as soon as one begins to decline and the world no longer has any use for him. He then complimented the class with the complemental the class with the ceases to grow intellectually and procomplimented the class upon the completion of the work of the High school and in a few well chosen words, presented the diplomas.

He complimented Miss Lucile John-

WITH LIVE STOCK

He complimented Miss Lucile Johnson for having made the highest average grade in her class throughout the entire school course and also for having made the highest mark in English for the same period and for which the Board of Education gave Honor Awards. He also stated that Charles Witt was deserving of honor as second in the class.

The presentation of diplomas was followed by a trio, "Daffodills" splendidly rendered by Mrs. C. C. Lewis, Miss Jennie Linn, and Mrs. Dudley

Carlsbad, New Mexico, May 7, 1916. Hon. Roy S. Waller, Tax Assessor for Eddy County, New Mexico, Sir:—You are hereby notified upon behalf of the Pecos Water Users' association, a corporation organized under the laws of the Territory, (Now State) of New Mexico, and each and every shareholder thereunder that it is our contention that all assessements of taxes for government, state and county purposes heretofore levied and assessed have been illegally assessed, and that any further assessment for such purposes will now be made at your own risk.

In support of our contention we cite you to the following decisions and authorities.

In support of our contention we cite you to the following decisions and authorities.

In connection with this question I think best to submit an opinion of Judge Will R. King, chief counsel of the United States Reclamation Service pertaining thereto and attached which cites the same authorities that I would have submitted to you.

I especially emphacise the decision of the Supreme Court of the United States in Stearns 25 Minnesota (179 U. S., 223, 251.) which says "But it has also been held that until the very last moment that liens or equitable rights of the United States are extinguished no matter how trivial or small may be the right or the lien reserved, the land is not subject to taxation."

If you can prove that the government does not retain a lien on every

are of land in the Carlsbad project then this ruling of the Supreme Court of the United States will not apply. "Department of the Interior, United States Reclamation Service, Office of Chief Counsel, November 15,

of Chief Counsel, November 15, 1915.

Mr. Samuel L. McGee, 304 East Holt Avenue, Pomona, California.
Dear Sir: I have fully considered the question as to the validity of the tax assessed against the improvements on your land by your state, and while it is not necessarily within the purview of the official duties of counsel for the reclamation service to look after and advise upon legal matters of this character, the question is of such importance to homesteaders upon reclamation projects that I deem it not inappropriate to give my views on the legal right of a state to make and collect assessments on permanent improvements upon land entered under the homestead and reclamation laws.

Our district counsel for your territory has heretofore been directed to take steps toward persuading the orficials of your county to cancel this tax, and he has endeavored to do so, but without avail.

The statutes of your state make provision for this class of assers-ments, and the supreme court of Caliments, and the supreme court of California, also the supreme courts of
some other states, have held tax asassessments of this nature to be valid
and enforceable. But, after careful
investigation, I am firmly of the oninion that assessments of this character are not enforceable and validly
can not be imposed upon permanent
improvements on lands held by a settler prior to date of final proof, and. ther prior to date of final proof, and, as to lands on reclamation projects, probably not until after issuance of patent, and under the present law possibly not until all liens held on the land by the United States are extinguished.

guished.

Taxation in such cases is an attempt to do indirectly what can not be done directly and clearly violates both the letter and spirit of the constitution of the United States, which gives to the general government exclusive jurisdiction in the disposal of the public domain. To secure title to these lands improvements are required by act of converse.

public domain. To secure title to these lands improvements are required by act of congress. If a state may, under pretense of taxation, sell the improvements on the public domain occupied by a bona lide sottle under the public land taws it can thereby prevent the disposal of the public domain in the manner provided by the laws of congress on the subject.

The supreme court of Idaho, in Cheney v. Minidoka county (144 Pac., 343), upheld an assessment made after the date of final proof and before the issuance of patent, where it seems some acts remained to be performed before the legal title left the United States, but this decision manifestly overlooks the case of United States v. Ricket (188 U. S., 432) hereafter referred to, and also the holding of the United States Supreme Court in Northern P. Ry. Co. v. Traill county (115 U. S., 600), in which latter case it is clearly held that as to the lands there considered, so long as anything remains to be done in order to divest the United States of the legal title, they are not subject to taxation. Permanent improvements are appurtenant to, and accordingly a part of, the land itself, hence not taxable unless the lands upon which located are taxable. And on this subject the United States Supreme Court, in Starns v. Minnesota (179 U. S., 223 (Continued on Last Page)
